PERSONAL PROFILE:

WordPress Developer working mainly in custom code with Gutenberg, including theme and PHP customisation. Experienced in building new websites, improving and maintaining existing client sites, integrating APIs and automated workflows, and applying technical SEO and performance optimisation. Strong focus on responsiveness, accessibility and long-term support. Also skilled in TypeScript and Angular for front-end development. Works directly with clients and colleagues to translate requirements into practical website improvements and provide ongoing maintenance. Background in Chemical Engineering brings a structured, analytical approach to problem-solving and delivery.

KEY SKILLS:

- Web: **WordPress** (custom code, Gutenberg), **PHP** (WordPress core usage, theme and plugin customisation), HTML, CSS, SCSS, JavaScript, TypeScript, REST API integration, **Technical SEO**, Performance Optimisation, SQL, **Angular**, Webpack, Firebase, Git, reusable components versioned in GitHub and integrated into WordPress
- Automation & Integrations: **Telegram Bot** Development**,** Automation Workflows, Data Monitoring
- UI/UX: Responsive layout, accessibility, cross-browser compatibility, Canva (branding assets, logo design, thumbnails, social media visuals), visual consistency across platforms
- Tools**:** GitHub**,** GitLab**, Git Bash,** VS Code**,** WebStorm**, Make**
- Full UK Driving Licence

EMPLOYMENT HISTORY:

The Fox Sales Factory **July 2025 - Present**

Role: Web Developer

- Designing and developing WordPress websites, mainly through custom code with Gutenberg, including theme and PHP customisation.
- Improving and maintaining existing client websites.
- Troubleshooting front-end and WordPress issues on live websites, including responsive layout and mobile rendering fixes and CSS/component conflicts in themes.
- Optimising website performance through image compression, responsive design improvements and front-end troubleshooting.
- Implementing on-page SEO best practices, including metadata, page structure, internal linking and keyword-focused content updates.
- Building and managing automated social media posting workflows using Make.
- Analysing performance metrics and reporting insights.
- Maintaining consistent brand identity and UI alignment across websites, social media and email materials.
- Creating email templates, marketing communications and AI-assisted content for blogs and digital campaigns.

Selected Web Projects

Additional work is covered by NDA and can't be shown here. Happy to discuss it in more detail on request.

PROJECTS:

Barbershop Website (Commercial Project)

- Designed and built a full website tailored to a real client's business goals.
- Built using TypeScript, SCSS, and Webpack, ensuring scalability and maintainability through Object-Oriented Programming (OOP) principles.
- Delivered a responsive and user-friendly design featuring interactive galleries and dynamic components tailored to the client's business needs.
  GitHub Repository: https://github.com/ProstoVika/barber-shop
  Live Demo: https://royalcut.uk/

Threat Detector (Personal Project)

- Built an automated Reddit monitoring system that scans posts and comments for configurable keywords.
- Developed a real-time alert pipeline that sends Telegram notifications when matching content is detected.
- Implemented sentiment analysis, exclusion rules, and duplicate filtering to reduce false positives.
- Designed a modular architecture with separate keyword, exclusion, and persistence layers for maintainability.
- Automated continuous monitoring through scheduled background jobs.

Tech Stack: JavaScript, Node.js, Reddit API, Telegram Bot API, Axios, Cron Jobs, Git.

PREVIOUS EXPERIENCE:

Powerful Force LTD **July 2024 - December 2024**

Role: Administrator

- Managed material procurement, purchase records and stock registration, and produced inventory and expenditure reports for management.

Self-Employed (Freelancer) **2019 - 2022**

Role: Draughtsperson

- Produced AutoCAD drawings, space plans and technical documentation in line with client engineering requirements and company templates.

Ukrainian Mineral Water Corporation **2018 - 2019**

Role: Chemical Engineer

- Analysed raw materials and production batches, maintained Quality department records and reported on data trends, following strict safety protocols.

Private Enterprise **2014 - 2015**

Role: Accounting

- Managed the balance sheet, receivables and payables, financial and annual reports, year-end forecasting and payroll support.

EDUCATION HISTORY:

Just IT Training Ltd, London **March 2024 - June 2024**

Digital Skills Bootcamp: Software Development, Pass

Foxminded, Ukraine **2022 - 2024**

Training centre: Front-end development, Pass

- Developed practical front-end projects under a mentor’s guidance, implementing features and refining code based on feedback.
- Built responsive interfaces using HTML, CSS and SCSS, and Angular applications using TypeScript, routing, reactive forms, RxJS and Firebase.
- Integrated REST APIs using asynchronous HTTP requests and used Git, GitLab and GitHub for version control and code review.

Odesa National Academy of Food Technologies, Ukraine **2013 - 2014**

Master's qualification in engineering

Kyiv National University of Food Technologies, Ukraine **2007 - 2013**

Bachelor's degree in food technology engineering

Activities & Interests: Piano, snowboarding and checkers.
